

Co-eXprise Issued Patent for Leading-Edge System Designed to Improve Collaboration and Communication Among Buyers and Suppliers

Wexford, PA-based Co-eXprise receives patent for a Content Management System that improves collaboration and minimizes risk across supply chain partners to enable more efficient and effective sourcing processes.

Wexford, PA ([PRWEB](#)) December 17, 2010 -- Co-eXprise, the leading provider of collaboration and total cost management solutions, was issued a patent, effective October 5, 2010, for a Content Management System that enables organizations to better collaborate—both internally and externally—to drive greater efficiencies in their sourcing processes. This proprietary technology is designed to ensure organizations can better share information, as well as import content into appropriate systems for collaboration purposes.

Collaboration for manufacturers is extremely difficult as globally distributed organizations must share critical technical data in a timely, efficient, and secure manner. This now-patented System is designed to enable multiple resources to work toward a common goal such as a collaborative negotiation within a strategic sourcing event, or collaboration during the introduction of a new product.

“Being issued this patent continues to differentiate Co-eXprise from all other companies in the Enterprise Sourcing solution market,” said Co-eXprise CEO and Founder William Blair. “No other company today can help its customers globally source materials as efficiently or securely as Co-eXprise.”

This System is a proprietary technology currently available only in Co-eXprise’s CX4 Collaborative Cost Management Solution.

About Co-eXprise, Inc.

Co-eXprise, the market leader in enterprise-class collaboration and total cost management solutions, enables companies to effectively manage sourcing activities for direct material and complex indirect spend categories. Deploying Co-eXprise solutions has dramatically improved global sourcing performance at Fortune 1000 companies in manufacturing, aerospace and defense, medical equipment, and consumer products.
